

Graffiti Remover

ACR® Graffiti Remover is designed to remove graffiti and tagging from a variety of surfaces, including concrete, brick, block and most masonry. ACR Graffiti Remover is a powerful, bio-based solvent system that can remove water-based graffiti, oil-based graffiti and permanent markers from most surfaces. ACR Graffiti Remover is ready to use and requires no mixing.

ACR Graffiti Remover becomes a tremendous graffiti deterrent when used in combination with GraffitiBlok Blocker & Concrete Waterproofer or GraffitiBlok Blocker and Masonry Sealer. GraffitiBlok products will keep graffiti from penetrating the surface and allow ACR Graffiti Remover to become more effective.

NOTE: ACR Graffiti Remover is a powerful but safe solvent, but it will effect some plastics. Test on surface prior to use.

ACR Graffiti Remover is a biodegradable product, however the graffiti sludge or waste should be disposed of according to local regulations.

PACKAGING

ACR Graffiti Remover comes in these sizes:

- 1 quart bottle with sprayer (.95 liters)
- 1 gallon bottles (3.8 liters)
- 5 gallon Pails (18.92 liters)
- 55 gallon drums (208.2 liters)

FEATURES

- Non-abrasive
- Bio-based
- High flash point
- Exceptional performance on most surfaces
- User friendly
- No toxic fumes
- Mild soap & water rinse

SHELF LIFE & STORAGE

Containers should be sealed and kept in a cool dry location. Avoid prolonged exposure to direct sunlight. If properly maintained this product has a shelf life of one (1) year.

DIRECTIONS

1. For best results, use at temperatures between 50° F. and 90° F. Do not allow to freeze as product will lose some of its effectiveness.
2. Shake or agitate contents for at least one (1) min prior to application and occasionally during use.
3. Use a sprayer or the spray bottle to evenly apply a liberal coat of ACR Graffiti Remover to the targeted area.
4. Allow remover to work. The longer it sets, the less work for you. Typically from 15 minutes to 3 hours, longer for heavy or old paint or paint stains. Product has a 12 hour wet time.

WARNING: Longer soak times may cause the remover to penetrate deeper than intended.

5. Use brush, putty knife, rag, scouring pad or scrubber for removal. If the surface is smooth, scrubbing may not be required. The more porous the surface, the more scrubbing that may be required.
6. Flush surface with soap and water to neutralize the effects of the product. If product is not neutralized, it will continue to work and may damage the surface.
7. Before disposal, wash rags in soap & water and dry in a well-ventilated area. Paint residue-soaked rags can cause spontaneous combustion if not handled properly.

Other ACR products that may be utilized for surface cleaning;

- ACR Concrete & Masonry Cleaner
- ACR Concrete & Masonry Etch
- ACR Emulsifying Cleaner
- ACR Rust Converter & Inhibitor

BIO BASED

ACR Graffiti Remover has been tested and contains no less than 65% bio-based materials. ACR Graffiti Remover does not contain any petroleum distillates or petroleum by-products.
